

The Company **B.P.Agrochemicals**, a partnership firm, was incorporated in 1999 by two young promoters with the motto of producing various Herbal Extracts & Phytochemicals to be used for various diversified applications including Pharmaceutical and cosmetic industries.

One of the promoter of the firm **Sh. Vikas Agarwal** is a young Chemical Engineer, First class Distinction Holder through out his Academic carrier, having Bachelor degree in Chemical Engineering from Mangalore University, Karnataka and P.G.Diploma in management & Entrepreneurship from T.A.Pai Management Institute, Manipal Karnataka.

The Second Promoter of the firm **Sh Ashish Agarwal**, is a young graduate in Commerce from Kumaon University, kashipur.

Both the partners belong to a well reputed business family of kashipur with a good consistent track record of their family business over the last 70 years. The strength of the company lies in Research & Development activities carried out by its group of scientists with state of art sophisticated research and development laboratory.

The promoters have set up this Extraction Unit in Kashipur, in the state of Uttarakhand. The unit gets its raw material from natural resources available in the Himalayan belt including Kumaon Hills because of its standing in Uttarakhand and other states of India as per requirement.

### Our Future Plans

The promoters of the firm B.P.Agrochemicals have already started working for the ultimate aim of becoming one of the top rated manufacturer of herbal extracts & Phytochemicals with the

establishment of distribution network all over the world. As the word “HERBAL” i.e., medicines/ cosmetics made from natural ingredients, getting enormous publicity in the western countries, the company do like to become a global player with its export oriented outlook. A series of scientific & commercial activities are being undertaken centered on medicinal plants. Expenditure on R & D work is being increased many fold and a lot of new products are being developed in house.

### **Our Infrastructure**

We have a well established infrastructure that spreads over an area of 65,000+sq.ft. Our infrastructure is equipped with all the hi-tech machineries to manufacture the products hygienically and within the time period. Sophisticated extraction plant alongwith various other small unit sections are being operated by us. We have a well equipped laboratory for conducting various tests. Drying, cleaning wet fruits, kernel separation, expelling, pelleting, pulverizing and solvent extraction are some of the processes that are undertaken for the manufacturing of the products. Our production unit also comprises of expellers, oil filter, boiler etc.

### **Manufacturing Facility**

The 6000 MT per annum raw material processing capacity is equipped with various combination of extractors and percolators, modern and efficient distillation system, reaction vessels, glass-lined reactors, ultra modern technology in filtration and separation, chromatographic columns and dryers (including tray dryer, vacuum tray dryer) to handle wide range of products. The entire manufacturing process is supervised and monitored by the team of highly experienced professionals of the industry to ensure the consistent quality product in the managed time schedule.
